**DO YOU  
WANT TO  
REDUCE  
CARRYBACK  
MATERIAL?**

**FIND OUT HOW**

**Carryback material** is material that fails to unload from a conveyor belt, falls off at unintended points or sticks to the belt can cause some major problems to your conveying application.

**Carryback material is estimated to account for 85% of all conveyor maintenance issues.**

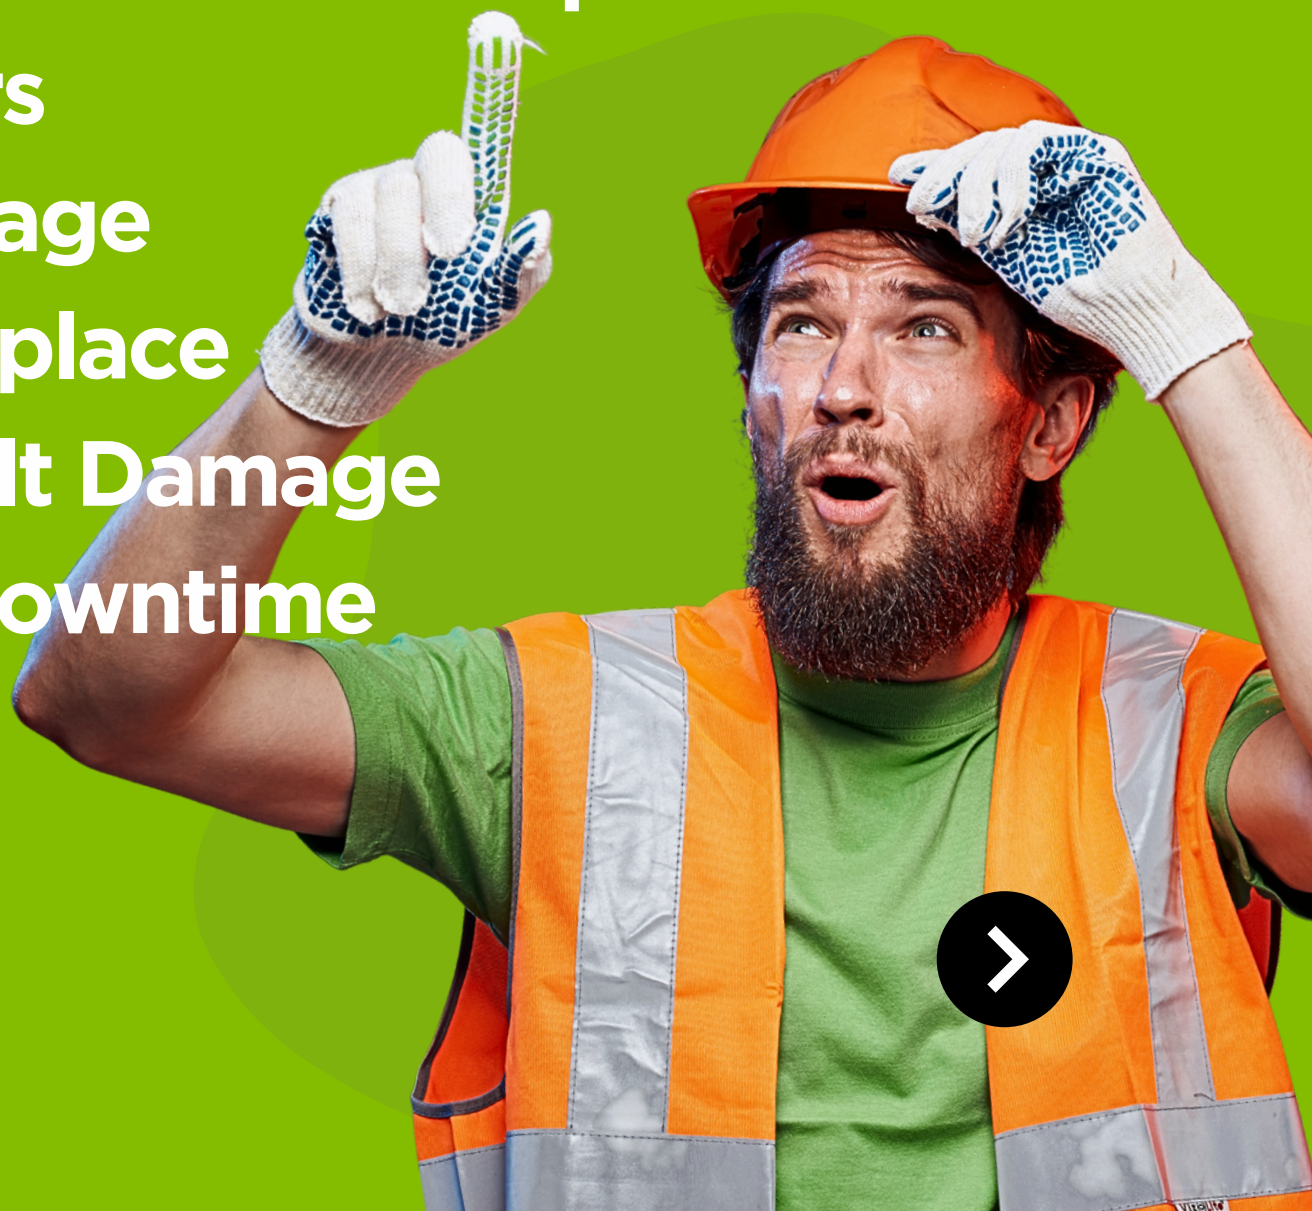

According to [BulkInsights.com](https://www.bulkinsights.com)

## **Problems associated with excessive Carryback material are:**

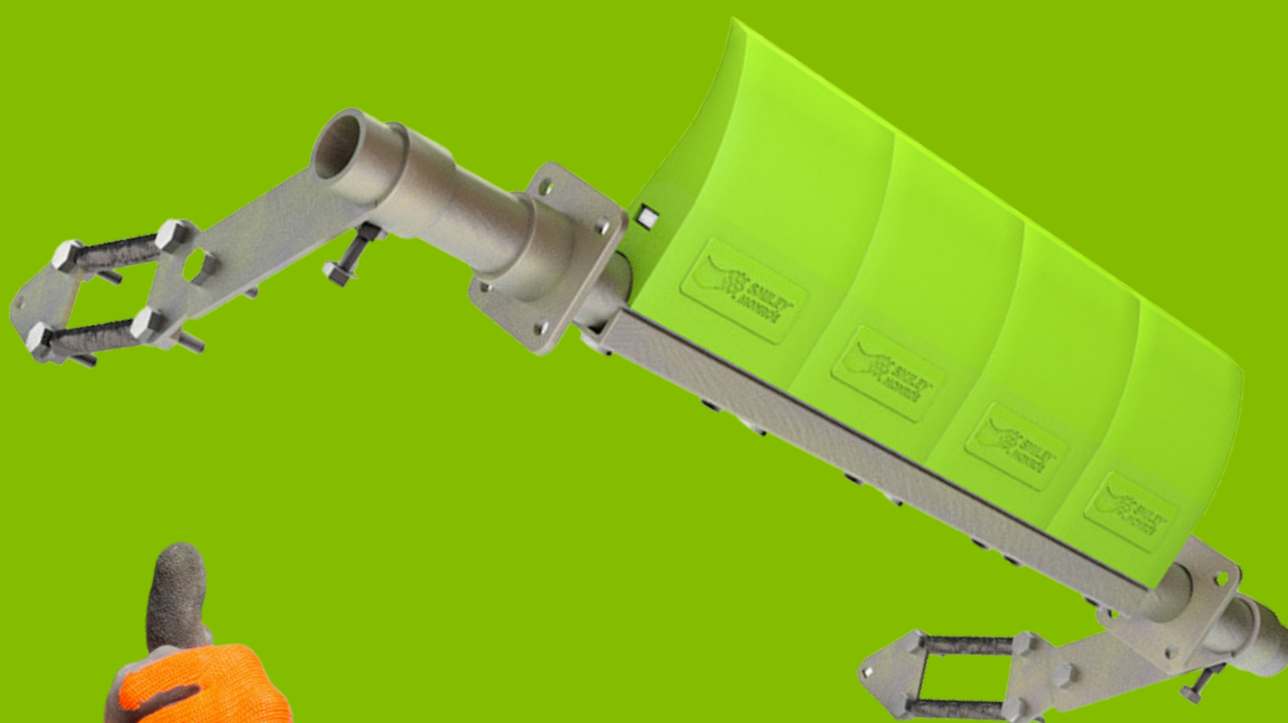

- **Excessive Material Build-up**
- **Seized Rollers**
- **Material Spillage**
- **Unsafe Workplace**
- **Conveyor Belt Damage**
- **Unplanned Downtime**
