# INTRODUCTION

**Downtime is costly. And inevitable. Whether planned maintenance or an emergency breakdown, machine downtime means lost production, lost revenue and a big invoice from a service crew.**

Keeping a ZIP CLIP® Replacement Belt on the shelf, gives you the power to control and significantly reduce downtime, whether it's planned or unplanned. ZIP CLIP® Belts are supplied ready-to-fit and can be installed in just one hour - without the need for a vulcanizing crew.

Because the splice (or 'joint') is mechanically fastened rather than vulcanized, there's no curing time, and as soon as it's installed and tensioned, ZIP CLIP® Belts are ready-to-run.

## SAVE ON COSTLY DOWNTIME

**Real life customer example:** Limestone quarry producing 1600 tons of material per day. On this site a breakdown often means two days of machine downtime whilst waiting on a vulcanizing crew and replacement conveyor belt. At a cost of \$2000 per hour, two days of downtime equates to a colossal loss of \$32,000. Having a ZIP CLIP® belt in stock transformed this customer's downtime to just two hours and slashed costs to only \$4000. That's a whopping saving of \$28,000!

**How much could you save by switching to ZIP CLIP® replacement conveyor belts?**

**3500** More than 3500 ZIP CLIP® belts are operating on mobile materials processing equipment around the world - from hard rock crushing and C&D waste to environmental, recycling and road construction applications.

# ZIP CLIP® BENEFITS

**GET BACK UP AND RUNNING WITHIN ONE HOUR** - no waiting on a vulcanizing crew

**MAXIMIZE UPTIME!**  
ZIP CLIP® belt installation time is 3.5 hours faster than cold & 6 hours faster than hot vulcanization\*

**READY TO RUN**  
ZIP CLIP® belts can be run as soon as they are tensioned

**PU BELT CLEANER FRIENDLY**  
Thanks to recessed splice

**IDEAL FOR SMALLER PULLEYS**

**NO SPECIALIST TOOLS OR TRAINING REQUIRED**

**BELT OPTIONS**  
Zip Clip® belts available as both flat and chevron

**OVERBAND MAGNETS**  
Suitable for use with overband magnets

\*ZIP CLIP® replacement belt install time savings based on having a skilled vulcanizing crew on site with a belt already prepared for vulcanization.

# ZIP CLIP® BELT ADVANTAGES

PRODUCT	CONNECTION TYPE	CONNECTION SPEED ON SITE	FACTORY PREPARATION	SPLICE (JOINT ) PROFILE	TROUGHABILITY	SMALLER PULLEYS	MATERIAL SPILLAGE
<b>ZIP CLIP® BELTS</b>	Hinged, stainless chromium steel staples with removable armored steel pin & retaining collars	Fastest - fitted and ready to run in one hour	Machine driven for precision & consistent pressure across the splice	Smooth, low and level - clips are recessed into the belt's top cover	Very Good	Excellent	Sift-free Screw-In splice perfect for sand, gravel and crushed rock
<b>HINGED FASTENERS</b>	Rivet hinged steel fasteners with removable nylon covered steel cable & retaining washers	Rapid	Manually hammered in, lacking precision, inconsistent pressure	Possibility of protruding & off-square splice	Very Good	Good	Sifting of fines
<b>SOLID PLATE FASTENERS</b>	Non-removable bolt solid plate fasteners	Slow	N/A - installed on site only	Possibility of protruding & off-square splice	Excellent - flexing of fastener results in belt damage	Poor	Sift-free

**FITTING INSTRUCTIONS INCLUDED**

## **SUPERIOR STRENGTH & STRAIGHTNESS**

Superior splice strength and belt straightness compared to hammer-in rivet hinged fasteners

## **ARMORED CONNECTING PINS**

ZIP CLIP® belts are supplied with 2 connecting pins (1 spare)

## **RECESSED SPLICE**

ZIP CLIP® belt's factory-made recessed splice is belt cleaner (PU blades) and feed boot skirting (rubber & PU) friendly

## **CORROSION & WEAR RESISTANT**

Stainless chromium-steel staples and stainless chromium-nickel armored connecting pin designed for maximum wear and rust resistance

## **STRONGER SPLICE**

Factory-made & machine driven for precision and consistent pressure across the splice for superior splice strength and straightness

**Emergency Breakdown?  
We've got you covered.**

Same day dispatch and premium delivery services now available.
