

Conveyor Belt Series

Endless Belts

SMILEY MONROE ADVANTAGE

- ✓ Manufactured to DIN 22102 and covered by a 12 month warranty
- ✓ Produced in **EP Multiply Flat & Chevron, Fabric-Breaker, Ripstop, Straight Warp** and **oil/heat/fire/frost resistant**
- ✓ Routinely quality tested in our in-house belt testing lab
- ✓ Available hold moulded with cleats and sidewalls in **cleated, sidewall, siderail, T-cleat** and **magnet belts**
- ✓ Superior quality and lower cost than open belts mounted and vulcanised in situ
- ✓ Belts can be V-jointed & branded with your company logo
- ✓ Belts can be supplied mechanically spliced (Zip Clip) ready for cold splicing and as open/cut lengths
- ✓ ISO 9001 OHSAS 18001

WORLD CLASS SUPPLY

As sole supplier of conveyor belts to many world class original equipment manufacturers (OEMs) - Including Powerscreen, Terex Finlay, Sandvik, McCloskey International, Metso, Keestrack, CDE Global, Telestack & Astec Industries – you are assured of the highest quality products and service.

We are the global market leader in the production of highly customised conveyor belts for the mobile crushing, screening and recycling sectors. Our superior standards of quality, delivery and aftersales support, combined with a 12 month manufacturer's warranty, set us apart from the competition.

Every highly customised **Endless belt** is covered by a 12 month warranty and is branded with its own unique Smiley Monroe quality identification number (see photo below - we can supply belts branded with your company's logo), which corresponds with barcoded information electronically captured during the entire production process.

Manufactured in our 30,000 sq.ft production facility under controlled conditions and customized to suit your application, our Endless conveyor belts offer both superior quality and lower cost than open belts mounted and vulcanised in situ. Where we have a presence on customers' sites, we are able to reduce your conveyor belt inventory levels and guarantee uninterrupted production.

WORLD CLASS QUALITY TESTING

Our Endless conveyor belts are routinely quality tested in our in-house belt testing lab, for abrasion resistance, tensile strength and adhesion levels of both the cover rubber and fabric.
